PROFESSIONAL SUMMARY

Junior Full-Stack Developer (**Node.js, NestJS, React, TypeScript, PostgreSQL**) with a BSc in Software Engineering (NaUKMA, 2026, GPA 91.36/100). Built and deployed a multi-tenant hiring platform over 6 months of mentorship by a senior software engineer, with role-based access control and **499 integration tests** in CI. Open-source contributor: 12 merged pull requests in nestjs/swagger, mui/material-ui and TanStack/form.

PROJECTS

Hiring Optimization & Automation Platform

Nov 2025 - Jun 2026

NestJS 11, TypeScript, PostgreSQL, TypeORM, React 19, Redux Toolkit, RTK Query, MUI, Mocha/Chai, Docker Compose, GitHub Actions
github.com/kkatalz/hiring-optimization-and-automatization-platform

- Designed, built and deployed a multi-tenant applicant tracking system end to end, from database schema to production (Vercel + Render + Supabase), under 6 months of mentorship by a senior software engineer with weekly code reviews.
- Isolated tenant data (cross-tenant requests return 403), enforced 5 access levels, and ranked applicants with an explainable weighted match score plus k-means clustering.
- Secured auth with short-lived JWT access tokens, rotating refresh tokens in httpOnly cookies, bcrypt and rate limits on login routes; kept server state (RTK Query) separate from client state (Redux Toolkit) in the React frontend.
- Wrote **499 integration tests in 14 suites** against a real PostgreSQL container, run on every push by GitHub Actions.

Music School Management System

Oct 2025 - Dec 2025

Team project, backend developer

NestJS 11, TypeORM, PostgreSQL, JWT, nodemailer, React 19, TanStack Query, Tailwind CSS
github.com/kkatalz/music-school

- Led the backend in a team of 3 and wrote most of it (59 of 108 backend commits); top contributor across the whole repository.
- Built a REST API for 3 roles (student, teacher, head teacher) with JWT authentication, role guards and email notifications on grade changes.

OPEN SOURCE

Open source: 12 merged pull requests, Oct 2026

nestjs/swagger (9), mui/material-ui (2), TanStack/form (1): bug fixes with regression tests, merged by the maintainers. Examples: nestjs/swagger #4169, mui/material-ui #49476, TanStack/form #2434.

EDUCATION & CERTIFICATIONS

BSc Software Engineering National University of Kyiv-Mohyla Academy (NaUKMA) 2022 - 2026
Kyiv
GPA 91.36/100

Frontend and JavaScript Program, Intermediate Level EPAM University Program Sep-Dec 2023, 90 hours

SKILLS

Frontend: JavaScript, TypeScript, HTML, CSS, React 19, Redux Toolkit, RTK Query, TanStack Query, Zustand, React Router, Zod, MUI, Tailwind CSS, Bootstrap, Axios, Vite

Backend: Node.js, NestJS, Express, PostgreSQL, MySQL, SQLite, MongoDB, TypeORM, Prisma, REST APIs, JWT auth, guards, rate limiting, bcrypt, Helmet, class-validator DTOs, cron jobs (@nestjs/schedule), file uploads (Multer), Swagger/OpenAPI

Integrations: SendGrid, Nodemailer, Sapling AI API, ml-kmeans (k-means clustering)

Testing / DevOps: Jest, Mocha/Chai/Sinon (unit + integration tests on real PostgreSQL), GitHub Actions CI, Docker Compose, Vercel, Render, Supabase

Tools: Git, ESLint, Prettier, Agile/Scrum, Figma, AI-assisted development (Claude) **Languages:** Ukrainian (native), English (C1)
